PREZ SEZ (from Maui)

ARRL Field Day has come and gone, and although many groups had to make changes in their plans due to fires and forest closures; still many set records. Ham Nations <http://www.twit.tv/hn> site may be worth looking at for Field Day News.

The next ARRL contest that several of our members will be in is the 10 GHz and up contest, in August and September. We will spend the first weekend of the contest on Harquahala Mountain near Wickenburg.

For more information go to the website: www.blm.gov/az/st/en/prog/recreation/autotour/harq_summit.html).

If you are interested to join us, contact myself or Kevin Jacobson, AD7OI, and we will help you get started on 10 GHz this year! Kevin found paths into California and Southern Arizona last year, and is planning a larger group this year. The more

stations we can put on Harquhala, the more excitement we get from others.

Dick Faust, K9IVB, will be presenting a program on his antenna for the August meeting. Unfortunately, I will be back from Maui after the meeting, in time for the 10 GHz contest. See you all in September. We always need program ideas. Keep them coming!

ECHOLINK

I have good news for the snow birds and others. Echolink is currently up and running. It is under the call NY7S-R, Node 598882 and is linked to the 2 meter repeater. At this time it is in a developmental phase but seems stable. Hopefully, in the near future more permanent arrangements will be made. For more information on Echolink, please visit www.echolink.org.

See details elsewhere in this issue

Note:

ARRL VEC test fee \$15. Bring photo identification, test fee - *exact change-please*, original and copies of current license and Certificates of Successful Completion of Examination (CSCE) to examination.

HAMS HELP WHEN PHONES FAIL AT SOUTHERN CALIFORNIA HOSPITAL

03/25/2011

By Joe Moell, K0OV, ARRL ARDF Coordinator

When nurses and other caregivers picked up their phones at Children's Hospital of Orange County ([CHOC](#)) in California in the early morning on March 21, there was no dial tone. A power surge caused the central processor in the hospital's phone switch to fail. Following established procedures, the Lead Operator at the CHOC switchboard immediately activated the Hospital Disaster Support Communications System ([HDSCS](#)), using an off-switch tie-line to reach April Moell, WA6OPS, head of this ARES® group that specializes in helping hospitals when their communications fail.

Moell established a 2 meter net and initiated a call-out of HDSCS members via telephone and pager. Ken Simpson, W6KOS, and Clay Stearns, KE6TZR, soon arrived at the hospital to help

establish a link with the outside world. Soon, more operators were at the hospital to communicate for its most important units, including the emergency department, neonatal intensive care, pediatric intensive care and the pharmacy.

She then contacted the supervisor at Orange County Communications to report the outage and to provide her telephone number for incoming calls to CHOC. This resulted in Moell receiving several urgent messages for the hospital, including one regarding the transport of a young patient coming in for an appendectomy. Message handling continued through the morning, with some of the first-to-arrive operators being relieved by other HDSCS members when they had to leave for work or other commitments.

By 10:45 AM, some phones were working, but spare parts were on their way from a supplier. HDSCS continued to provide unit-to-unit and hospital-to-community messaging as needed, including coordination of patient treatments and a request for blood. At 1:02 PM, the repair crew announced that the phone system was back to normal, except for some voicemail functions. HDSCS members remained on station for 30 more minutes, as they always do to insure that phone systems are stable before securing.

This is the 31st year of HDSCS service to medical facilities in Orange County and the 114th activation to provide communications support when telephones have failed or overloaded. The reasons for HDSCS involvement have ranged from equipment failure, to cut cables, to natural disasters such as earthquakes, floods and wildfires. Each member has their own go-kit that is ready to take to any of the 36 supported hospitals to establish communications. The HDSCS is familiar with CHOC because the group has participated in drills and communications emergencies there before, including an external phone outage that lasted 22 hours in August 2006 when a construction accident severed fiber optic cables.

FCC LICENSE EXAMS

Next exam session at DeVry University Saturday **October 1**. Exams start at 9:00 AM and all tests must be concluded by 11:00 AM. Check-in at the Library on the second floor, southeast corner. Bring photo ID and the original operator license and CSCEs and photocopies of each if applicable. ARRL VEC Exam Fee is \$15 for all elements taken once. An additional fee applies for a retest of any element. Retest is at the option of the VEs. Pay fee by check to ARRL/VEC or exact amount in cash – Volunteer Examiners cannot make change.

FREE ONLINE HAM LICENSE PRACTICE TEST

I've written a set of free online FCC ham radio license exam practice tests that I hope you will find useful.

<http://copaseticflows.appspot.com/hamtest>

There are randomly generated practice exams for all three license classes in the U.S. as well as for the Canadian and New Zealand ham radio exams.

Online help topics are provided for many of the exam questions. The list of help topics is constantly growing as I get time to add to it. Users can track their test scores, as well as a count of how many of the question pool questions they've practiced over time. In addition to random practice exams, users can automatically practice exams with questions they haven't seen yet in each sub-element group, or questions they haven't gotten correct in each sub-element group.

Please let me know if you find it handy, or if you think of any ways to make it better. Thanks!
