Mon-Thur		Call-in Net	147.300 MHz, Tone 162.2 Hz	8:00 PM

PREZ SEZ

Welcome to a new year. Yes, it really is 2012. There is going to be many challenges this year, but I believe that we are up to meeting them and beating them.

I am very proud of our Board of Directors. They have a vision of what we can do and how we can better serve our community through Ham Radio and have fun doing it. Isn't that what Ham radio is all about? Helping our communities and have fun while we do.

Ladies and Gentlemen, we need your help. We need ideas for programs at our meetings. We have some already planned but we need help generating plans for those months not already planned out. Please contact one of the officers

or board members and let us know your ideas. Perhaps you would even be willing to be a Presenter at a meeting. What a concept!!

I hope and pray that your new year is a great one. I believe that we are overcomers and that we will meet and beat all challenges that come our way. Have a GREAT year!!

J. William (Bill) Roberts, Jr., KD7JMN

*** ANNUAL AUCTION - FEB 6 ***

Our annual auction will be Feb 6, 2012. It will be at St. Clement of Rome social hall, 15800 Del Web Blvd. Sun City Az.

A TOOL FOR YOUR HAM RADIO TOOLKIT

Ham radio poses a certain risk during foul weather, especially lightning strikes. One strike or even static buildup during windy times can cause damage to equipment. The best protection is to disconnect outside wiring from the shack entry point. In cases of being on the air while making an important contact, it would be helpful to know how close the storm is.

Watching NOAA weather radar combined with satellite information is one way to monitor the weather but there is a better way. Today's technology supplies us with a useful tool to do just that. Outdoor sensor systems are available to detect lightning and generate data that come with software to process that data. It is a bit expensive. You can look it up on the internet to understand how it works and find it an interesting read.

However, in searching for all this I found a site maintained by Matthew Pace, member of Skywarn, in Apache Junction that makes all this very simple. He has installed such a system, supplies the National Weather Service with his information and has made it available for use on the internet. You can go to this well maintained, well presented site to monitor lightning strikes and it is free. Reliable data than simply listening for it or watching for strikes out the window.

There is a link on the site to make a donation if you are so inclined. His site covers the entire state of Arizona and has tools to zoom in closer to his location. With a little study, one can learn how to use the site to best advantage. Other information is available such as temperature, barometric pressure and other weather data. There are color indicators to show what type lightning, how many strikes are occurring etc. You can actually track a storm to determine if you need to disconnect or watch it pass off away from you, providing much more

Visit the site, check out all the features and bookmark it for another tool in your ham radio toolkit.: <http://www.weatherbus.com/light.php>

FCC PUBLIC NOTICE

The FCC released a Public Notice on January 6, reminding land mobile licensees, frequency coordinators and equipment manufacturers that they have less than one year to transition to narrowband operations in the 150-174 and 421-512 MHz bands. While the latter frequency range includes amateur service allocations, radio amateurs are not affected by the narrowbanding requirement.

Land mobile operation is permitted in parts of the 421-430 MHz band in the areas around Detroit, Cleveland and Buffalo, and land mobile licensees in these areas are among those who will have to migrate to narrowband (12.5 kHz or narrower) technology by January 1, 2013. Amateur operation is not permitted along the Canadian border (north of Line A as defined in the FCC Rules) in the band 420-430 MHz.

NEW SHORTSKIP EDITOR

I want to thank Cindy Morrill, KD7JVW, for volunteering to be the new Shortskip editor. I know that she will be a terrific editor.

Thank you for all of your support and articles that you have sent me. I have appreciated being your editor for the last five years. I know you will support Cindy in the same manner.

YEAR 2012 MEMBERSHIP

Year 2011 memberships expire January 31 2012.

Year 2012 memberships will be valid through January 31 2013. Your 2012 membership is effective the day it reaches the Treasurer. A filled out and signed form must accompany a dues payment. Year 2012 dues are \$15 for individual and any additional Hams at the same address, or \$7.50 **after July 1, 2012**. Please list only one individual on the front of the form. List other licensed family members and their call signs on the back of the form; that makes it easier to transcribe entries correctly.

Members whose dues reach the Treasurer by February 1, 2012 will be listed in the Roster of Associated Members 2012 booklet. Members who renew or join later will be listed in the online Roster. Application forms are available at monthly meetings or can be downloaded from the WVARC web site and printed out.

WEST VALLEY AMATEUR RADIO CLUB, INC.

MEMBERSHIP APPLICATION AND RENEWAL FORM

NAME _____ CALL (if any) _____ ARRL MEMBER? **Y N** (circle one please)

ADDRESS: _____ CITY: _____ STATE: _____ ZIP: _____ - _____

Your phone number and E-Mail address will be published in the Roster only if you fill in these items below:

PHONE (_____) _____ - _____ E-Mail: _____

I agree to abide by the Constitution and By-Laws of the West Valley Amateur Radio Club and pay such dues as assessed upon members. Dues are currently \$15 per year per family of licensed members residing at the same address, payable by the January meeting. Dues of \$7.50 are available for Late Joiners after July 1. Write name and call of additional (licensed) family members on the back of this application.

Send to WVARC, PO Box 1573, Sun City, AZ 85372-1573, or pay at any regular meeting.
